A: It's always best if you download the official release from their website. If you do not have that capability you can download the.zip file of their version and extract it. That will have the.dll for your version. The path you provided is correct. Make sure you download the.dll you need and not the folder. { "name": "ESLint", "version": "1.0.0", "description": "Validate and format JavaScript files using the ESLint rules and configuration", "main": "index.js", "scripts": { "lint": "eslint --ignore-path. --ext.js", "lint:watch": "eslint --ignore-path. --ext.js -w", "watch": "eslint --ignore-path. --ext.js -w -v", "publish": "npm run lint && npm run test && npm run release" }, "repository": { "type": "git", "url": "" }, "keywords": [ "eslint", "javascript", "validator", "linter", "linting", "validation" ], "author": "The ESLint Authors", "license": "BSD-3-Clause", "devDependencies": { "eslint": "^4.6.0", "eslint-config-standard": "^10.2.1", "eslint-config-standard-jsx": "^4.1.0", "eslint-plugin-import": "^2.7.0", "eslint-plugin-node": "^4.0.1", "eslint-plugin-promise": "^3.7.0", "eslint-plugin-react": "^7.5.0" }
