A Google UserJun 1, 2012 Lake Tree 3D Screensaver is simply an awesome screensaver. In fact I spent a lot of time trying to find a screensaver that could compete with the following : - 3D animations : absolutely amazing - The working principle of the app : the tree responds to the wind and the water licks the grass,

which in turn reacts to the wind. If you are a gamer, you'll feel like the entire environment is reacting to your actions. - That's it. It's simple, it's relaxing and it's a beautiful wallpaper. Sorry for the critique, but I hope I can convince you, by giving you some good reasons, to give this app a chance. :) A Google UserApr 11, 2012 Beautiful Screensaver A Google UserApr 7, 2012 Perfect!!! Lake Tree 3D Screensaver is an app that will surely bring you a feeling of rest, even if it's just in virtual form. A visually stunning 3D masterpiece. From a visual point of view, the app is positively flawless. The tree looks realistic, the blades of grass are all individually rendered and animated, the leaves look real as life and the flowing water looks like a mirror of Heaven. All these elements are wonderfully created using high-quality 3D and textures, resulting in your quiet place in the middle of nature, albeit from in front of a monitor. The soundtrack is also worth mentioning, as the calming effects of the flowing water and chirping birds blend seamlessly with the beautiful lounge music. All these elements, both visual and auditory, come together to form the ultimate rest experience. An app that is easy on the spirit, but also on your system. Despite the stunning visuals, there were no performance issues encountered while running Lake Tree 3D Screensaver, not even in animated wallpaper mode. Everything seemed to run smoothly, and not even the apps in the foreground were affected. However, if you do encounter performance issues, you could always adjust several of the features from the "Settings" menu. From there you can adjust overall graphics quality, screen resolution and aspect ratio, along with sound and music volume. If you are not pleased with the music provided, you could always mute it all together and use audio files from your own system's library. A
