Count down to the New Year with this wonderful and quite relaxing screensaver! This simple but cool screensaver will surely remind you of the most important moments of the past year. Makes your computer screen more interesting Installing the screensaver is quite easy, and only takes a few seconds. The fact that it does not require any special options to be configured, and does not require any music to be playing, does not harm either. It will remind you of the most important moments of the year, but it is not necessary that you appreciate it and see it as a proper countdown. It may also leave a bad taste in your mouth, depending on what your maturity level is, but you should always keep in mind that this is the beauty of this screensaver: once you have seen it for the first time, you will probably be pretty excited to see what the New Year will bring. Ever since the dawn of the mobile age, people have been spending countless hours connected to their smartphone, checking for new messages and updating their social networks. No matter how long you spend looking at your phone, it's almost certain that there will be times when you wish you had more privacy. A quick peek at the world through an application like Be Quiet! gives you an idea of just how much of your life is peeking through that phone. An application that lets you turn off your smartphone As we mentioned, Be Quiet! can be installed on any smartphone. It is designed to block any form of notification received through your smartphone. It gives you the chance to stop the incessant alerts and messages, and also the notifications from a variety of apps. You can even get rid of those annoying vibrations from your smartphone. With the application, you will be able to minimize the phone's visual distractions, such as screen brightness, notifications, and alerts. Notifications are the big priority here. The app lets you choose between the default setting and the setting for the apps you wish to disable. Sophisticated user interface Be Quiet! features a sleek and modern interface that will make it easy to start using the app. The interface is made up of three tabs: Notifications, Apps, and Settings. With the Notification tab, you can see the notifications for each app, which you can turn off. When you select the app, you get more options in the form of notifications that you want to keep or get rid of. On the Apps tab, you can select the apps you want to get rid of. You can disable the notifications for the apps in the Settings tab. As for the settings, you get to choose what you want to see on the screen. The only choice that you will have is between the default setting and the nighttime mode setting. We found the app to be incredibly accurate and easy to use, which makes it a good choice for anyone looking to free up space on their phone. Just look for the app in your app store and download it.
