New Movie - Download Torrent.America's first national policy to address climate change was adopted on Nov. 5, 1988, by President Ronald Reagan and Congress in the nation's first-ever national conservation law. The landmark legislation created the United States Environmental Protection Agency and the Natural Resources Conservation Service. It also called for the U.S. Forest Service and the Department of the Interior to play a central role in the management of national forests. Today, more than 30 years later, what started as a voluntary regime of emissions reduction from U.S. power plants is now almost entirely mandatory. Net greenhouse gas emissions from electric power plants have dropped 80 percent since 1990, largely thanks to the Regional Greenhouse Gas Initiative (RGGI) in the Northeast. But the impact of RGGI on the nation's overall climate trend remains controversial. For example, some scientists have concluded that RGGI has had a negligible effect on U.S. greenhouse gas emissions.
