We are given the following two sets of students in a classroom. Students in Set A can be in more than one class. Students in Set B can be in one class only. Figure out the number of pairs of students who have the same class, and the total number of students from the two sets, who attend that class. The Input Format The first line of the input consists of an integer T, the number of test cases in the program. Each of the next T lines contains two space-separated integers, a and b, where a is the number of students in Set A, and b is the number of students in Set B. The Output Format For each test case, output a single integer, consisting of: The number of pairs of students that belong to the same class. The number of students from Set A and Set B that belong to the same class. Sample Input #1 5 1 20

I have tried to crack it with no success and I can't do anything about it. I'm trying to get my music back. I have checked my local hard drives and didn't find the.rar file anywhere on my HD. However, I did find the file xa92-?npkv-gcqzw-SATCHAN folder on a different partition on the same HD. Am I confusing it with the GoldWave serial key installed on my system? If I am then I have found the GoldWave serial key I used to download the music. I can make another crack and download the missing music but I was wondering if I could restore it back to the system. Hi All, I have used the great genemu suite to create an ISO of my old game (Magic Street 2019). I used this ISO to restore back my old game. However, now I am having some problems, I opened my old game folder and tried to move the Music and sounds folders. It wasnt possible (because the ISO wasnt mounted I suppose), 79a2804d6b
