You can use the Crop tool to help guide you when cropping an image to help you to create a better and more appealing composition. By selecting an area of the image, you can crop it, set presets, and adjust the crop using four handles, each attached to the four corners of the crop selection area.

When you're happy with your crop selection, you can further tweak the crop by rotating it. By selecting your crop with the Crop tool, you can click Rotate, activate a preset, or use one of the five preset options, each of which crops the image in a specific way. When finished, click "Done."

When you're happy, you can apply one of Adobe's five color correction presets by selecting one from the Presets palette or using the Adjustment Brush (which is located at the top of your toolbox, near the new and draw tools).

Color Correction presets have been developed by Adobe's experts to offer quick GIF-style results, although they also offer more advanced control over your images, such as the ability to increase contrast, adjust brightness and Saturation, and apply spot color.

When it comes to RAM, again, if you are able to buy more than do so. RAM is what allows your computer to handle multiple tasks at once. When working as a designer or digital artist, using multiple Adobe applications at the same time can become a very normal practice. Adobe applications can be very taxing on any computer and more RAM helps to complete those tasks quickly. Having more RAM connected to your processor will ensure you have a highly optimized powerhouse computer to handle any and all Photoshop tasks. Ever since I was able to afford my own computer, I never purchased a computer with less than 16GB of RAM. Most computers nowadays come with at least 8GB of RAM which is sufficient. The one nice thing about RAM unlike a processor is that you can replace the RAM and add more after purchasing it. However, make sure to check this as again, companies like Apple have made it impossible to replace the RAM in their computers. It is always worth double checking!
